

Power loss, Virus attack, Disgruntled staff, Systems failures.

These are just a few of the events that DO happen, **are you prepared?**

Hosted Continuity - Managed Business Continuity and Disaster Recovery Experts

Our clients sleep easy, knowing that whatever the nature and scale of the disaster they are protected and in good hands.

For the most effective real-time DR service contact:

www.hostedcontinuity.com | [1300 806 606](tel:1300806606) | info@hosted-continuity.com.au

WHAT MAKES THE HOSTED CONTINUITY SOLUTION SPECIAL?

- No capital cost.
- The ONLY solution for total business continuity with the full recovery process already planned and provided for. Should an event occur, local failover can be facilitated automatically or we already have dedicated seating and VPN access ready.
- Completely managed end to end service (installation to restoration) which diversifies risk and dependence on infrastructure and staff.
- Our unique IP protects more than your data and system state. All your applications, customisation and settings are replicated in real-time at the smallest possible level ensuring no data loss and immediate environment restoration irrespective of hardware.
- Dedicated and managed communications link included with subscription.
- 24 / 7 proactive monitoring. We tell you when and exactly what critical services (e.g. exchange) are impacted.

THE SOLUTION - Tiered offering to meet your business needs

Hosted Reproduction (BASIC)	Local replication and failover capability (appliance) Real time reporting / monitoring	Support (8*5 phone) 1 days testing per year
Hosted Restoration	Scheduled data transfer to offsite data centre Dedicated communications link	Support (8*5 phone; 24*7 email) 2 days testing per year
Hosted Resuscitation	'real-time' data transfer to offsite data centre	Support (8*7 phone; 24*7 email) 2 days testing per year
Hosted Resurrection (COMPREHENSIVE)	Guaranteed recovery centre 'hot seating' allocation	Support (24*7 phone/email) 3 days testing per year
Bespoke Hosted	Completely customised solution to compliment all systems.	

Each tier encompasses the previous tiers offering

KEY FEATURES

Zero Data Loss:

Byte level changes are captured in real time! This results in maximising the protection for near zero data loss and specific point-in-time recovery as well as ensuring the existing infrastructure is able to perform without extra burden.

Critical Data or Whole Server Protection:

More than just a back up solution the Hosted Continuity Solution provides an entire usable replica of your server. It is no good simply having your data, the information that your entire environment provides is what is important.

Rapid Access to Recovered Systems:

When systems go down all that matters is a fast recovery. The appliance solution provides failover capability to be able to run your systems from the moment they go down.

Achieve Cost Efficiencies:

Move your DR cost to an operating expense. No administrative overhead. No purchase of hardware, software or data centre space. No extra or dedicated staff time required. A complete managed service for a consistent monthly fee allows your business to improve cash flow with no capital expenditure.

Power loss, virus attack, system failures and disasters do happen! Two out of five businesses that experience downtime go out of business within five years.

Hosted Continuity has a revolutionary product offering in disaster recovery – a real time solution that means you and your staff can be up within minutes with your current data following server downtime or disaster. We have extensive experience and knowledge in the design and implementation of Business Continuity and Disaster Recovery Planning Solutions.

The Hosted Continuity Solution is the ONLY fully hosted subscription service in the marketplace providing almost immediate recovery time and zero data loss .
